Additional Case Information:

The victim was discovered in the late afternoon hours of June 3, 1978 in Collier County. She had extensive dental work done of both upper and lower teeth. She had ceramic bridges on most of her teeth. Most of her dental work would have been performed approximately two years prior to her death, and she may have still been under the dentist care. Evidence suggests that victim may have had chronic ear infections which may have resulted in some degree of hearing loss. No clothing or personal effects were found with the body.
